

**EXPERIENCED FULL STACK ENGINEER WITH FINANCE BACKGROUND**

---

Experienced Fullstack Engineer with a strong background in finance, combining 3+ years of software development experience with 10+ years in financial management. Proven track record in developing web applications, implementing innovative solutions, and driving efficiency across projects. Adept at stakeholder management, project leadership, and leveraging technology to streamline processes.

I created a 5 minute video recording introducing myself and showing a project I built that you can view [here](#).
